Part of Conextivity Group

COMPLIANCE STATEMENT REGARDING
Regulation (EU) 2019/1021 for Persistent Organic Pollutants (POPs)

According to European Chemicals Agency (ECHA), persistent organic pollutants (POPs) are organic substances that persist in the environment, accumulate in living organisms and pose a risk to our health and the environment. They can be transported by air, water or migratory species across international borders, reaching regions where they have never been produced or used.

European Chemicals Agency (ECHA) does provide a list of 32 unique substances, subject to prohibition, restrictions, and waste management. More information: https://echa.europa.eu/list-of-substances-subject-to-pops-regulation

Fischer Connectors hereby certifies that, to the best of its knowledge, its products* do not include any POP, from ECHA list (last updated 31 OCT 2024).

October 2025
E.Carli
QHSE Director

*Materials for specific cable assemblies manufactured outside of our Fischer Connectors Swiss, EU and US facilities and materials and items provided by customers for the specific manufacture and production of custom assemblies are not assessed by Fischer Connectors for compliance to POPs regulation.
